What is the headboard of a bed?

Headboard (furniture)

A headboard is a piece of furniture that attaches to the head of a bed—the end of a bed where a person's head rests. A headboard may often be complemented by a footboard for aesthetic balance.

A headboard can add a distinctive, personal touch to your bed and even to the whole bedroom. Our range covers a wide choice of styles, colours and materials to suit many different tastes. Adding a headboard to your bed is a quick and easy way to give your bedroom a sophisticated look.
