Aluminum
Hinge Door

<https://www.catalogmachine.com/bm-enterprises-srl/catalogs/aluminum-doors>

115 Series Hinge Door

Materials: Aluminum with frame

Door Panel Thickness: 50mm

Door Frame: 115*75*50mm with sealing strip fixed with H

Trim Cover: Customizable with frame on wall thickness

Craftsmanship: Customizable based on design style

Color: Spray painting, paint coating, wood-grain transfer printing

Glass: Customizable glass specifications

Lock Set: 1: Standard 40*300*7000 anti-pry lock 2: Optional: 40*300*7000 integrated three-point lock

Hinges: Push hinge (But hinge) / Double-door hinges

Hinge Accessories: 1: Surface-mounted hinge 2: Surface-mounted hinges installed in a recessed manner 3: Concealed hinge

Threshold: 1: Without threshold 2: 50mm 3: 75mm

Optional Hardware/Accessories: Knob/handles

Maximum Dimensions: 1: Single door: 1250*3300mm, standard with concealed hinges (surface-mounted hinges need 4 hinge)

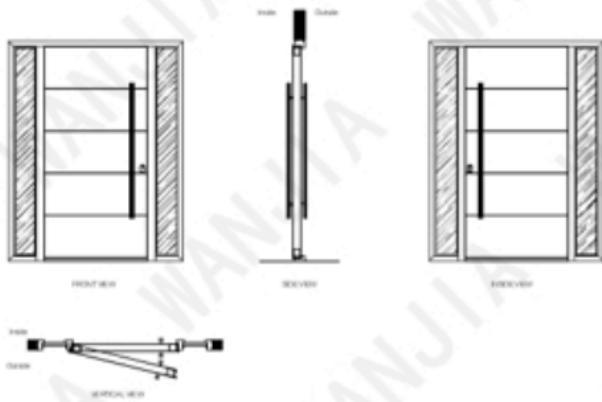

2: Double door: 2300*3300mm

Door Panel Aluminum/Profile Thickness: Custom 3mm-20mm (standard: 4mm)

Internal Filling: 1: Polyurethane fire-resistant board 2: Aluminum honeycomb

Filling Function: Thermal insulation, soundproofing, and fire resistance

Door Frame: Integrated welding, detachable assembly available (Ensure compliance with the maximum container loading dimensions).

100 Series Hinge Door

Material: Aluminum with frame

Door Panel Thickness: 8.6mm

Door Frame: 100/100/50mm multi-cavity structure with sealing strip (fixed width)

Frame Color: Customizable with base on overall thickness

Craftsmanship: Customizable based on design styles

Color: Spray painting, paint coating, wood grain transfer printing

Glass: Customizable glass specifications

Lock Set: 1: Standard 40*388*7068 anti-pry lock 2: Optional: integrated three-point lock (40*388*7068)

Hinges: Unique hinge / Butt hinge / Double door hinge

Hinge Accessories: 1: Surface-mounted hinges 2: Concealed hinges

Threshold: 1: Without threshold 2: 3520 3: 6550

Optional Hardware Accessories: Knobs/Handles

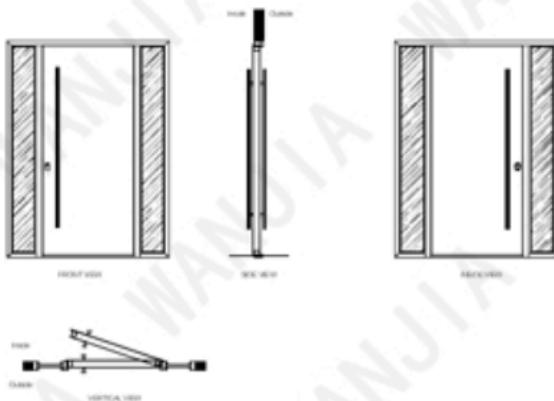

Maximum Dimensions: 1: Single door: 900*2500mm, standard with concealed hinges (surface-mounted hinges need 24 hinge) 2: Double door: 1800*2500mm

Door Panel Aluminum Profile Thickness: Colorful 3mm~6mm (Standard 3mm)

Internal Filling: 1: Polyurethane fire-resistant board 2: Aluminum honeycomb

Filling Function: Thermal insulation, soundproofing, and fire resistance

Door Frame: Integrated welding (non-detachable assembly), fixed glass panels can be added on both sides (Ensure compliance with the maximum container loading dimensions.)

100 Series Thermal Break Hinge Door

Material: Thermal break aluminum (with frame)

Door Panel Thickness: 100mm

Door Frame: 100/85/103mm with sealing strip and fixed with Trim Cover. The width can be customized according to the wall thickness.

Craftsmanship: Custom craftsmanship based on the style

Gates: Spraying, painting, wood grain transfer printing

Glass: Custom glass specifications

Lock Set: ① 24*24*70mm lock set (standard) ② 24*24*70mm integrated three-point lock

Hinge: Standard thermal break hinge fittings

Opening: Single/Double Maximum 120-degree opening

Threshold: ① Without threshold ② 3010 ③ 3050

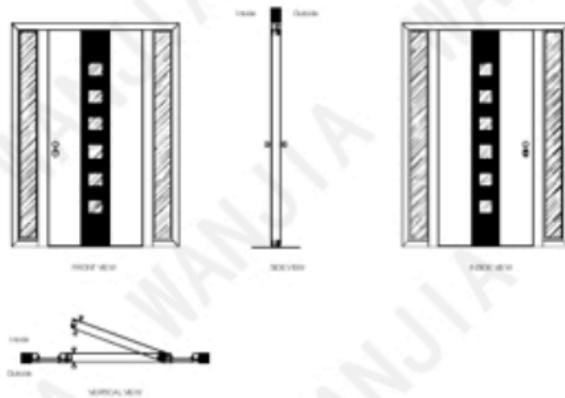

Optional Hardware/Accessories: Handles/Knobs

Door Panel Aluminum Plate Thickness: 3mm~10mm Thick aluminum plates are available as an option. The standard default is 4mm plate.

Interlocking: ① Polyurethane wax fire-resistant board ② Aluminum honeycomb

Filling Function: It provides certain thermal insulation, soundproofing, and fire-resistant properties.

Door Frame: ① Integrated sealing: It can receive disassembled or assembled. Please check if it can be loaded in the container.

100 concealed hinge for thermal break system door weight capacity 100KG, and the opening angle 120-degrees.

100 Series Pivot Door

Materials: Aluminum/Steel

Door Panel Thickness: 10mm

Door Frame: 100/75/4.7mm sealing strips on both sides of the door frame. Fixed with hidden dust-proof strips at the top and bottom.

Trim Cover: The width can be customized according to the wall thickness.

Craftsmanship: Custom craftsmanship based on the style

Colors: Spraying, painting, wood grain transfer printing

Glass: Custom glass specifications

Lock Set: (1) 30*389*2088 lock set (standard) (2) 35*389*705 integrated three-point locking system

Door Spring: Dama/ANH/ Domestic

Opening: Single/Double (90-degree inward / outward opening, 180-degree inward / outward opening)

Threshold: (1) Without threshold 15mm (2) 50mm

Optional Hardware/Accessories: Handles/Knobs

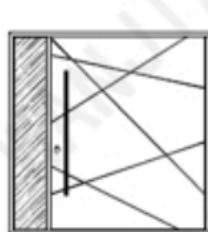

Minimum W/B: 1250mm width

Door Leaf Aluminum Plate Thickness: 3mm~20mm Thickness plate are available, with the standard default being 4mm plate.

Internal Filling: (1) Polyurethane fire-resistant board (2) Aluminum honeycomb

Filling Function: Provides certain thermal insulation, soundproofing, and fire-resistant properties.

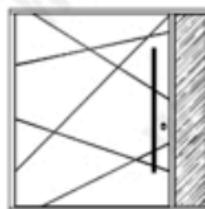

Door Frame: (1) Integrated welding (2) Modular Process (For oversized products, the outer frame can be disassembled and assembled on-site)
