Octagonal

Eight sides, a cedar frame, and a cupola at the top give the Octagonal a shape you won't find in an ordinary greenhouse. It works as a centerpiece in a formal garden, at the end of a path, or anywhere a rectangular greenhouse would feel too plain.

Inside, a U-shaped layout runs around a central walkway, so plants, pots, and supplies stay within easy reach from every side. The roof rises to more than 11 feet at the peak, leaving plenty of headroom and space for taller plants. Automatic roof vents open as the temperature climbs, and louvre windows let you add cross-ventilation on warm days. Double hinged doors open wide for bringing in large pots, bags of soil, and equipment.

The half-boarded cedar walls give the lower section a solid, traditional look and a sheltered spot for storage beneath the benches. Above, the glass lets in light all the way around.

Square ft.:101 sq ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

SKU	Size (W × L × H)	Roof Windows / Vents	Roof Window Openers	Side Windows / Louvres	Doors

Durham T-Shape

Petite in size but big on charm, the Durham T-shaped greenhouse brings the character of a traditional English cottage to smaller gardens. With a peak height of nearly 9 feet at the entrance, this compact cedar glasshouse offers surprising room to grow.

Whether flanked by urns or seasonal displays, the single hinged door opens into a charming entryway leading to the rear growing area, where upper and lower shelving keeps plants and gardening essentials organized.

Louvre windows and automatic-opening roof vents help maintain comfortable growing conditions, while tempered safety glass welcomes natural sunlight. Crafted from cedar that ages gracefully over time, the Durham brings timeless character to the garden.

Square ft.:87 sq ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Lancing

A garden room with a clear view is what makes the Lancing Cedar Greenhouse so captivating. Its delicate appearance belies the strength of its durable cedar framework and 3 mm tempered safety glass, designed for lasting performance. The glass-to-ground design rises to a peak height of over 11 feet, creating an airy, light-filled space with plenty of room to grow.

Whether bringing the outdoors in or enjoying the garden from within, the Lancing offers an inviting place for plants and people alike. Upper and lower shelves along one sidewall provide room for growing and display, while automatic-opening roof vents and louvre windows encourage fresh air circulation. Powder-coated aluminum glazing capping completes this elegant English glasshouse, where traditional craftsmanship meets the beauty of the surrounding garden.

Square ft.:202 sq ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Cambridge

With its distinctive T-shaped design and steep roof pitch, the Cambridge makes a statement in any garden. It's a place for growing, gathering, or curling up with a good book.

Generous 5'7" sidewalls create an open, comfortable growing space with room for taller plants. A single hinged door beneath the charming portico gives the Cambridge the welcoming feel of a garden room.

Automatic roof vents and louvre windows help regulate the temperature. Upper and lower shelves along the rear wall put plants on display while leaving room to work or settle into a chair and enjoy the view.

Gutters with downspouts make rainwater harvesting easy, while roof cresting adds a touch of Victorian charm.

Square ft.:123 sq ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Fusion

Bringing two essential garden outbuildings together, the Fusion combines a greenhouse and workshop in one thoughtfully designed structure. The workshop provides a dedicated space for starting seedlings, potting plants, arranging bouquets, and storing gardening tools, while the glass-to-ground greenhouse offers a protected environment for plants to thrive.

A single sliding door opens into the greenhouse, where louvre windows and automatic-opening roof vents encourage fresh air circulation. On the workshop side, a wide, lockable hinged door makes it easy to move tools and gardening essentials in and out. The workshop can be positioned on either the left or right side to suit your garden's layout.

The best of both worlds come together in a versatile garden building that works as hard as you do.

Square ft.:115 sq. ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Cheltenham

Making the most of every square foot, the narrow Cheltenham draws the eye upward with its soaring 10-foot peak. Decorative supports and a steep 45-degree roof pitch give this traditional English glasshouse architectural character, while the pitched roof helps shed snow.

A single hinged door swings inward and secures with a keyed lock. Automatic-opening roof vents and louvre windows encourage cross-ventilation, helping maintain comfortable growing conditions. The half-boarded walls add traditional character while creating a sheltered space for plants and gardening essentials.

Complete with gutters and downspouts, the Cheltenham proves that even a narrow space can offer room to grow.

Square ft.:109 sq ft

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Riga 2S Polycarbonate Greenhouse

The Riga S series delivers the strength and insulation of the Riga greenhouse family in a more compact footprint. Its signature curved profile is engineered for challenging climates, helping wind move around the structure while encouraging snow to slide from the roof rather than accumulate overhead.

Insulating twin-wall polycarbonate surrounds the growing space, with 8 mm panels along the curved sidewalls and thicker 10 mm panels at the gable ends. An automatically opening roof vent and large rear window provide ventilation, while the lockable Dutch-style door offers flexible access and additional airflow.

Made in Germany for serious hobby gardeners, the Riga S series brings year-round growing capability to gardens where space is at a premium.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Square ft.:54 sq.ft.

SKU	Size (W × L × H)	Roof Windows / Vents	Roof Window Openers	Side Windows / Louvres	Doors

RIGA IVs	7'8" W × 14' L × 7'1" H	2 roof vents	2 automatic		Lockable Dutch-style door

Berlin

Ideal for lower rooflines, the Berlin Solarveranda lean-to attaches directly beneath your eaves, giving single-story and ranch-style homes a spacious, sheltered room off the back door. Use it as a greenhouse, a three-season porch, or an open patio cover, depending on the season and how you want to use the space.

On warm days, open the doors and push up the side panels to let fresh air move through. When the weather turns, close everything up for a protected space to grow, dine, or relax. Adjustable openings, optional roof vents, and multiple door configurations, including a lockable hinged door, make it easy to keep the space comfortable.

Durable, low-maintenance aluminum profiles are built for lasting performance. High-impact Plexiglas® glazing comes standard for its strength and clarity, with tempered glass also available.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Square ft.:

RIGA Black Polycarbonate Greenhouse

The Riga Black pairs the serious performance of the Riga with a more open, decorative view of the garden. A crystal-clear front lets you see into the greenhouse and allows plants and the interior to become part of the landscape, while the black powder-coated frame and Victorian cast-metal roof cresting add traditional greenhouse character.

Behind the distinctive appearance is the proven construction of the Riga series. Insulated twin-wall polycarbonate helps retain warmth, while the signature curved profile is engineered to stand up to challenging wind and snow conditions. Two automatic roof vents and an oversized rear window provide natural ventilation, while the wide, lockable Dutch-style door makes everyday access easy.

Made in Germany, the Riga Black combines serious growing performance with a greenhouse you'll want to see in the garden.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Square ft.:

Rondo 1 Garden Pavilion

Part shade, part shelter, the Rondo pavilion gives your garden a place to gather.

A stylish addition to any landscape, the Rondo is built from two movable half-shells that form both its walls and its roof. Rotate them together or independently to make the pavilion as open or as sheltered as you like: follow the sun on a beautiful day, turn your back to the wind, or close it up when rain moves in.

Use it as an intimate spot for dining, reading, relaxing, or simply seeing your garden from a new point of view. Safety glass lines the sides for clear views out, and impact-resistant Plexiglas® forms the elegant domed roof overhead. When the pavilion is closed, a wind turbine ventilator keeps the air circulating.

Square ft.:133 sq.ft.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Livingten 5 Insulated Greenhouse

For gardeners who don't want winter to have the final word, the Livingten is a handsome insulated greenhouse ideal for cold climates. Engineered in Germany, it pairs 22mm double-pane insulated safety glass with thermally separated aluminum profiles to hold in warmth and keep the cold at bay, even when snow piles up outside.

Overwinter your citrus and figs, start seeds weeks ahead of the last frost, and keep greens growing through the darkest months. When spring arrives, double sliding doors on both the gable end and the side open the space to fresh air, while automatic roof vents and pop-out side windows manage the heat. Retractable shade curtains soften the summer sun, and integrated LED lighting carries you through short winter afternoons and long summer evenings.

Built for real winters and designed to be enjoyed, the Livingten 5 keeps your garden growing in every season.

Square ft.:163 sq.ft.

Royal Antique Orangerie

The gem of the garden, the Royal Antique Orangerie is designed for much more than growing. Narrow 14-inch panes of tempered glass and decorative lower panels give the Orangerie classic European character, while its 24-inch stem wall adds height and architectural presence to the landscape. Four roof vents and two louvre windows encourage natural airflow throughout the 185-square-foot interior, while wide double hinged doors make it easy to move larger plants and furnishings inside. Made in Belgium by Janssens, this distinctive T-shaped greenhouse creates a beautiful setting for growing, gathering, and enjoying the garden throughout the seasons.

Square ft.:185 sq.ft.

Melbourne Nordic Hexagonal Pavilion - 13'8" x 13'8"

The Melbourne brings the architectural presence of a traditional garden pavilion to a highly finished outdoor living space. Its hexagonal design and generous glazing create panoramic garden views, while the 10'5" peak adds height and an airy sense of space for relaxing, dining, entertaining, or enjoying the garden throughout the seasons.

The roof combines 25 mm multiwall polycarbonate insulation with a tile-effect exterior and white textured interior. Below, 28 mm double-pane insulated Low-E glass is accented with chrome Georgian glazing bars, while insulated aluminum panels form the lower walls.

Four lockable roof vents provide ventilation, and double hinged doors with multi-point locks provide secure access.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Square ft.:133 sq ft

Madison Nordic Garden Room - 11' x 11'

The Madison adds flexible living space to the garden in a clean, modern design. Its 10'2" x 10'2" interior provides room for a home office, studio, hobby space, or quiet retreat without requiring a large footprint. Two steel-reinforced PVC-u sliding patio doors feature double-pane insulated Low-E glass and multi-point locks, opening the room to its surroundings while providing secure access. Two sides are constructed with powder-coated aluminum composite insulated wall panels, while the 25 mm multiwall polycarbonate roof is finished with aluminum capping. An included base, cover, and vinyl flooring complete the garden room.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Square ft.:103 sq ft

Royal Victorian

Stately and elegant, the Royal Victorian blends classic English architecture with a generous rectangular floor plan.

Tall 6'7" sidewalls create an airy interior, while roof windows with automatic or spindle openers and louvre windows with cold-weather covers help regulate growing conditions as temperatures change. Integrated gutters, downspouts, and a misting system make it easier to maintain your growing environment.

For gardeners who want more flexibility, an optional hybrid roof upgrade replaces the standard glass roof with polycarbonate designed to help reduce heat and UV exposure. The included door drop kit also lets you install on a knee wall, creating additional interior height.

Whether you're planning a productive year-round greenhouse or a peaceful garden retreat, the Royal Victorian offers the space and versatility to bring your plans to life.

Square ft.:79 sq.ft.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Royal Orangerie

With its grand entryway and classic European styling, the Royal Orangerie makes a striking statement in any garden. Generous 6'7" sidewalls and an expansive interior offer plenty of room for growing, entertaining, or simply enjoying a little time among the plants. Double sliding doors create an inviting entrance, while three roof windows with openers and two louvre windows with cold weather covers help manage ventilation as the seasons change. With ample height and room to arrange your growing space, the Royal Orangerie is as practical as it is elegant. Available in Black and Fir Green, with additional colors offered by special order, the Royal Orangerie brings the charm of historic European orangeries into the modern garden. Whether you're growing citrus or simply enjoying the garden view, it's a place to cultivate your favorite plants and make room for a few more.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Gigant

Designed for expansion and endless possibilities, the Gigant takes greenhouse growing to a grand scale. At nearly 20 feet wide and 30 feet long, its generous floor plan offers room for ambitious growing projects, citrus and specimen plants, or a combination of gardening, entertaining, and relaxation. With heavy-duty roof framing, structural bracing, and three reinforced portal frames supporting its wide roof span, the Gigant is built to withstand harsh weather, making it a strong choice for gardeners in areas with heavy snow and high winds. Eight roof vents and six side windows encourage natural airflow throughout the interior, while two sets of double hinged doors provide convenient access. The Gigant is highly customizable, with the option to install it on a knee wall for additional height and architectural presence. Whether you envision it as a dedicated growing space, a garden retreat, or a light-filled setting for gathering with friends, the Gigant lets you create a greenhouse that goes beyond tradition.

Square ft.:370 sq ft

Modern

Maximize light with the Modern's clean, architectural lines.

With its distinctive silhouette and unique pent roof design, it makes a striking statement in modern landscapes and gardens.

Designed for style and strength, the Modern features a reinforced shed-style roof with double-thick roof extrusions and cross braces that support the overlapping glass panes. Hinged double doors create an inviting entrance, while push-out windows, louvre windows, and roof vents provide plenty of fresh air circulation.

Whether you're growing your favorite plants or creating a home office or wellness retreat, the Modern brings contemporary style to a nature-filled setting.

Square ft.:79 sq.ft.

JUNIOR VICTORIAN

The Junior Victorian is for gardeners who believe a greenhouse should be just as beautiful as the landscape it sits in. With its steeply pitched British roof, decorative Victorian cresting, and timeless architectural details, this classic glasshouse brings elegance and character to any garden. The distinctive 38° roofline is more than a beautiful design feature, helping rainwater drain efficiently and snow slide off rather than accumulate overhead.

With 5'2" side walls and a single sliding door, the Junior Victorian is beautifully suited to smaller gardens and urban spaces. For an added architectural touch, it can be installed on a low brick knee wall, creating a stately appearance reminiscent of traditional English glasshouses.

Inside, roof windows encourage ventilation, creating a welcoming environment for plants to flourish. Whether serving as an extension of your outdoor living space or becoming a beloved part of your daily gardening ritual, the Junior Victorian offers a beautiful place to grow, gather, and enjoy the changing seasons.

Square ft.:79 sq.ft.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Junior Orangerie

A stylish garden room, the Junior Orangerie brings growing and relaxing together in a distinctive T-shaped design. A single sliding door opens into a welcoming interior with 5'2" sidewalls and room for vegetables, herbs, and a favorite chair among the plants.

Built with sturdy aluminum framing and tempered safety glass, the Junior Orangerie combines lasting durability with classic European design. Two automatic roof vents help release warm air as temperatures rise, while the T-shaped layout and generous glazing fill the interior with natural light.

Add shade curtains to soften the sunlight and bring a little drama to the space, then make it your own with your favorite plants, furnishings, and personal touches. More than a place for gardening, it becomes an extension of your home.

Square ft.:116 sq.ft.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.

Cathedral

With possibilities soaring, the Cathedral offers an expansive 300 square feet of growing space beneath a dramatic glass cupola. Bathed in natural light, this breathtaking greenhouse offers plenty of room for citrus trees, climbing plants, and prized collections, with space for people to feel right at home, too. Four roof vents, two top-hinged side windows, and two louvre windows encourage natural airflow throughout the interior, while double hinged doors and an additional sliding door provide flexible access. Two heavy-duty aluminum portal frames reinforce the wide structure, bringing strength and stability to its grand proportions. The Cathedral's crowning feature is its glass cupola, which draws the eye upward and offers a striking place to hang decorative lighting and set the mood throughout the seasons.

Retro Royal Victorian

With its ornate aluminum paneling and old-world European charm, the Retro Victorian is a greenhouse worthy of a Windsor estate. Decorative relief panels, powder-coated for lasting beauty, transform this glasshouse into an architectural focal point reminiscent of the grand gardens and historic estates of Europe. Narrow 14-inch glass panes complement the intricate detailing, while generous 6'7" sidewalls draw the eye upward and create a bright, spacious interior. Behind its historic appearance are the practical features of a modern greenhouse. Push-out side windows and roof vents encourage fresh air circulation, while an included misting system helps manage growing conditions. Integrated gutters and downspouts add everyday convenience, bringing modern functionality to a design that celebrates the elegance of a bygone era. Additional sizes and colors are available by special order. Please allow 3–4 months for delivery.

Square ft.:250 sq.ft.

Standard Size Options: Customization options include hinged doors, placement on a knee/stem wall, additional venting, color, size and more.
