

INDUSTRIAL FASTENERS & HARDWARE SUPPLY

FastenFit Industries

Nuts, Bolts & Fastener Solutions Catalog

Name	Description	Specifications	Standards
Anchor Bolts	Premium chemical and mechanical anchor bolts trusted worldwide for safety, strength, and durability in construction and structural anchoring applications.		
Building and Construction Materials	High quality building and construction materials supplied at competitive prices, backed by a team of experienced professionals committed to timely service.		
Eye Bolts	Reliable eye bolts designed for lifting, rigging, and anchoring applications requiring dependable load-bearing connection points.		
Hand Tools	Reliable hand tools and hardware trading supplies for industrial and construction use.		
Heavy / HEX Nuts	High quality heavy and hex nuts made from high-grade carbon steel, alloy steel, and stainless steel. High tensile strength for heavy-duty applications, corrosion and rust-resistant finish, precision threading for tight and reliable fit. Available in UNC, UNF, and Metric threads. Ideal for construction, power generation, oil & gas, automotive, and heavy engineering sectors.	Size Range: M6 to M72. Finishes: Zinc Plated, Black Oxide, Hot Dip Galvanized, Plain	DIN 934, ASTM A563, A194, ISO 4032

Name	Description	Specifications	Standards
Hex Bolts / Structural Bolts	High-strength Hex Bolts and Structural Bolts engineered for precision, durability, and reliability. Designed for heavy-duty applications in construction, infrastructure, machinery, automotive, and industrial projects. Advanced heat treatment and surface finishing guarantee exceptional tensile strength, corrosion resistance, and long service life.	Grades: 4.6, 8.8, 10.9, 12.9, B7, L7, B16 (Carbon/Alloy Steel), Stainless Steel 316, 304, 316L, 304L, B8M, B8, Special Grades (Duplex, Super Duplex, Monel, Incoloy, Hastelloy). Size Range: M6 to M72 (¼" to 3"). Thread Types: Full Thread / Half Thread. Surface Finish: Black Oxide, Hot Dip Galvanized, Electro Zinc Plated, Phosphated, Zinc Flake, Zn+Ni, PTFE 1070, Xylar 1014	ISO 4014, ISO 4017, DIN 931, DIN 933, ASTM A325, ASTM A490, IS 1364, IS 3757, BS EN 14399
Pipe Line Stud Bolts & Gaskets	High quality pipe line stud bolts and gaskets supplied for demanding oil & gas and industrial piping applications, engineered for reliable sealing and heavy-duty fastening performance.		
Safety PPE's	Personal protective equipment (PPE) supplied to meet safety standards for construction, oil & gas, and industrial work environments.		
Shear Stud with Ferrule	Shear studs with ferrule supplied for steel-concrete composite construction, ensuring strong structural bonding in building and infrastructure projects.		
Threaded Bars / Round Bars	High-strength threaded bars and round bars supplied in standard and custom sizes for construction, anchoring, and structural engineering applications.		

Name	Description	Specifications	Standards
U Bolts & U Clamps	Durable U Bolts and U Clamps designed for secure pipe and structural mounting applications across construction and industrial projects.		
Washers	High quality washers supplied at competitive prices for a wide range of fastening applications, ensuring proper load distribution and joint protection.
