# MG3 Accessories

## MG3 2013-2018 High Flow Performance Air Filter (consumable)

Developed to look like the OEM MG3 Panel Air Filter, this performance version has been designed to be less restrictive and offer a higher air flow to improve the performance of your MG3. A Dyno Test conducted on this filter fitted to an MG3 with our MG3 Stainless Steel Exhaust system gave the MG3 an extra 2.8HP after fitting.

## MG3 Front and Rear Set of Mud flaps (as sold by MG Dealers)

These Mud flaps are manufactured specifically for the MG3 and fit perfectly. Set of 4 £49.99+vat.

## MG3 Wing Mirror Rain Deflectors

Attached in seconds to give your MG3 Wing Mirrors a sportier look whilst also deflecting Rain

## MG3 Chrome Internal Bumper Sill Protector

Fits over existing plastic internal bumper sill trim

## MG3 Slim Sill Plate MG3 Logo

Slimline MG3 Sill Plate Set (set of 4) for front and rear sills.

### Arm Rest NEW STYLE with USB Connection and LED Lighting

Armrest with USB Connectivity for charging/powering Mobile Phones and other accessories. LED Interior Lighting - USB Cigarette Lighter Adaptor provided. (photos show MG3 fitting but this fits in MGZS as well)

**New Product:-**

Specifically desgned for the MG3 (2013-2018 (2018> MG3 System in Development).

Cat Back, 2" Stainless Steel Sports Exhuast system.

Google "mg3 sports exhaust video" to hear the pop and burble this system produces.

**2" "Cat Back" Stainless Steel Exhaust system developed specifically for the MG3 here in the UK, by Acoustic Innovations (CyBox), a leading manufacturer and supplier of specialist performance exhaust technology and systems. This high grade stainless system is manufactured in 4 separate sections as against the standard MG3 2 section system. This allows our system to be changed easily and cost effectively in the event of any damage to a specific section. This combined with the ability to quickly change the end tail pipe when required to give a complete new look and sound. There is also a built in adjustment for the projection of the tail pipe from the rear panel. Warranty: There is a "Lifetime Warranty"with this system, please see our Terms and Conditions for this product.**

Dyno Testing gave a 10.2HP Max (4HP average) and a 12FtLb Torque increase against a standard MG3.

Dyno Testing conducted by  [www.jkm.org.uk/performance/dyno.htm](http://www.jkm.org.uk/performance/dyno.htm)

2 Week production lead time required at present

**FEATURE**

I've driven around 30000 miles in a variety of machines over the years, but I have never had to replace a car before. I was asked to drive a MG3 car with the usual 1300cc engine for a week. I was asked to drive a MG3 with the stainless steel system for a week. The MG3 was named the 'Biggest of MG' and AMC Parts and the other named the 'MG3 with the stainless steel system'.

**The power of the 3**  
By Andy Knott

In December 2015 MG Car Club Safety Fast magazine editor Andy Knott and events co-ordinator John Hutchison conducted independent testing of a standard MG3 and an MG3 with the stainless system and air filter fitted. The results were published in the March 2016 edition of the magazine

**FEATURE**

How far our small cars go in the rain. I would like to see the MG3 with the stainless steel system and air filter fitted. The MG3 with the stainless steel system and air filter fitted is a better car than the standard MG3.

**FEATURE**

The MG3 with the stainless steel system and air filter fitted is a better car than the standard MG3. The MG3 with the stainless steel system and air filter fitted is a better car than the standard MG3.

## MG6 Cat Back Stainless Steel Exhaust System

### Price:

MG6 1.8TCi (Mk1) Hatchback Cat Back Stainless Exhaust System. We have worked with Cybox to produce a cat back Stainless Steel Exhaust system

At present no dyno graphs are available. To fit this system you will be required to cut the standard system just after the Catalytic Converter. A Sports Cat version will be available in the next 3 months (under development). The 3" 'Twin' pipe is the only option available at present also. The photograph shows the rear finishers (Tailpipes) have been sculpted to follow the contour of the MG6 Bumper.

MG3 (#40628) 2013-2018

MG6 (#40393) 1.8T Petrol

These leads have been proven to dramatically improve the drivability of the Petrol MG6 and the 2013-2018 MG3.

Owners feedback:-

Ian Clegg (Customer) *"And the Magnecor March goes on lol, Best thing I did was buying those Magnecor leads I posted my results on here and the Mod took off like wildfire, the lead change is a must now for the MG6 as the improvement is to noticeable."*

Paul Day (Customer) *"These leads need to come with a warning on them. I've fired a set to my 6 and am shocked at the result. Entering the motorway this morning and before I knew it I was doing.....well let's just say, not the speed limit. These leads have changed this car dramatically. Warning needs to state, "these leads can have a dramatic affect on your cars performance!"*

Karl Mason *"I know a lot of people have said it already but I just fitted my magnecor cables and holy moly what a difference, much much smoother pulling away and I had a kind of splutter/flat spot at 2K ish revs which has also gone, if you have a petrol and haven't done it I highly recommend that you do"*

Stephen Taylor (Customer and MG Head Office Technician) *"So, after a day of town driving yesterday and a journey to Oulton park from Stoke and back, the MG6 felt like a different car. Even my 11 year old son said that the pick up felt a lot smoother than before" and "Magnecor...wow, what a difference, the juddering that I had in second and the lumpy idle have gone"*

Peter Bowler *"Joined the Magnecor gang today and have to say much smoother on acceleration gets rid of that slight judder you some times get , well worth it"*
