## **Styx 8-Wire Fence Batten – Suits 2.50mm, 4.0mm, and Barbed Wire**

Price: **120.00**

The Styx 8-Wire Fence Batten is a high-performance alternative to traditional wooden battens or lightning droppers. Designed for ease of installation and long-term durability, it's ideal for rural fencing systems requiring **up to 8 wire strands**.

### **Key Features:**

- Compatible with 8-wire farm fencing systems
- Suits 2.50mm plain wire, 4.0mm (No. 8) wire, and 1 strand of barbed wire
- Barbed wire option includes 25 integrated clips (barbed wire should not be electrified)
- UV-stabilised and weather-resistant for long-term outdoor performance
- No staples or tools required for installation
- Matches steel Y posts (waratahs) for easy integration (where compatible)
- The long-life alternative to a wooden batten
- Made in New Zealand
- Suits wire configurations from 3 through to 8 wires
- 10-year warranty against breakage

### **Available Wire Configurations:**

The Styx 8-Wire Fence Battens can be configured in the following ways:

## Styx 9-Wire Fence Batten – Suits 2.50mm, 4.0mm, and Barbed Wire

Price: **121.00**

The Styx 9-Wire Fence Batten is a high-performance alternative to traditional wooden battens or lightning droppers. Designed for ease of installation and long-term durability, it's ideal for rural fencing systems requiring **up to 9 wire strands**.

### Key Features:

- Compatible with 9-wire farm fencing systems
- Suits 2.50mm (12g) plain wire, 4.0mm (No. 8) wire, and 1 strand of barbed wire
- Barbed wire option includes 25 integrated clips (barbed wire should not be electrified)
- UV-stabilised and weather-resistant for long-term outdoor performance
- No staples or tools required for installation
- Matches steel Y posts (waratahs) for easy integration (where compatible)
- The long-life alternative to a wooden batten
- Made in New Zealand
- Suits wire configurations from 3 through to 9 wires
- **10-year** warranty against breakage

### Available Wire Configurations:

The Styx 9-Wire Fence Battens can be configured in the following ways:

## Styx 5-7 Wire Fence Batten – Suits 2.50m wire-not suitable for steel Y posts

Price: **108.00**

The Styx 5-7 Wire Fence Batten is a durable and easy-to-install replacement for traditional wooden battens and lightning droppers. Designed specifically for **2.50mm wire diameter** in **5 or 7-wire fence configurations**, it provides a clean, safe, and long-lasting solution for electric fencing and standard fencing setups.

### Key Features:

- Designed for 5 and 7 wire fence layouts using 2.50mm wire
- Perfect for electric (hot) wire setups
- Non-compatible with steel Y posts – suited to traditional fence layouts
- No staples or tools required for installation
- The long-life alternative to a wooden batten
- UV-stabilised and built for New Zealand farming conditions
- Made in New Zealand
- 10-year warranty against breakage

### Available Wire Configurations:

## Styx 3-10 Wire Fence Batten (6/8) - Suits 2.50mm Wire

Price: **128.00**

The Styx 6/8 Wire Dropper is a high-performance alternative to traditional wooden or lightning droppers, specifically engineered for electric fences using 2.50mm wire. This durable, weather-resistant dropper provides superior alignment and support for your hot wires, ensuring consistency and reliability across farm fencing lines.

Its robust UV-stabilised polymer construction ensures it stands up to extreme conditions, and its universal channel design **accommodates 3 to 10 wire configurations** with ease.

### Key Features:

- **3-10 Wire Compatible** – Designed to work seamlessly with fences using 3 to 10 wires.
- **2.50mm Wire Fit** – Perfectly sized to suit standard 2.50mm wire, commonly used in electric and standard fences.
- **Durable Polymer Construction** – Made to endure harsh weather conditions with a 10-year breakage warranty.
- **Non-Conductive** – Safe to use on live wires, unlike steel or lightning droppers which can cause shorts.
- **Lightweight & Easy to Install** – Significantly lighter and quicker to handle than wooden battens.

## AKO - Duo Power Station XDi 15000 smart Electric Fence Energiser -20 Joule

Price: 2495.00

### Maximum control for your pasture – with the AKO Power Station XDI 15000 Smart 12/230V Mains/Solar energiser

Do you want absolute safety for your animals and maximum flexibility in fence monitoring?

The **AKO Power Station XDI 15000 Smart 12V** brings innovative technology directly to your smartphone. With integrated cloud connectivity, you can control and monitor your fence system remotely, no matter where you are. The distance-independent control (on/off, GPS tracking) not only gives you peace of mind, but also full control – even when you're not in the pasture.

This ultra-powerful 12/230 volt duo device is particularly suitable for long fences with heavy vegetation and keeps even very robust animals such as bulls and sheep safe in the pasture. The digital display and multi-colour bar graph let you keep an eye on everything. If the voltage drops below the set value, you receive a real-time alarm message directly on your smartphone – permanently free of charge via the app. This way, you're always one step ahead, and your animals are fully protected.

## AKO S4000 Smart Solar Electric Fence Energiser – 4.0 joules output-services 16-24 hectares

Price: **2156.00**

The **AKO S4000 Smart Solar Electric Fence Energiser** is a next-generation, high-powered solar unit with integrated cloud connectivity and intelligent battery management. Designed for permanent electric fencing systems, it offers distance-neutral remote control, live app monitoring, and fully autonomous operation during the grazing season.

### Key Features:

- Powerful solar energiser suitable for fences up to 110km (VDE-tested)
- Smart cloud connectivity for real-time remote monitoring and control via free smartphone app
- Permanent mobile data transfer included – no extra subscription or fees
- Instant alerts when fence voltage drops below your pre-set threshold
- Ideal for livestock such as horses, cattle, goats, sheep, and deer
- Integrated GPS tracking, ON/OFF control, and fence health visibility
- Works reliably with light to medium vegetation on most fence systems

### Performance and Durability:

## Sun Power S2400 Smart Solar Fence Energiser - 2.4 Joules output- Services 8-15 Hectares

Price: **1816.00**

The Sun Power S2400 Smart Solar Energiser is a high-performance, all-in-one solution for permanent electric fencing, designed to deliver exceptional power and efficiency for horse, cattle, goat, and sheep paddocks. With the ability to power fences up to 72km, it's ideal for medium to large-scale farming operations and is optimized for low-maintenance, season-long use.

Featuring smartphone monitoring, this energiser gives you control and visibility from anywhere, making it one of the smartest options available for serious fencing needs. It includes intelligent battery management, integrated lightning protection, a power-saving switch, and a robust, weatherproof casing for reliable operation in all conditions.

The S2400 also includes a High/Low/Off switch, deep discharge protection for battery longevity, and an ultra-bright LED status light. With a 5-year performance guarantee on the solar module, it's a dependable, future-ready energiser that delivers both power and peace of mind.

Key Features:

- Powers electric fences up to 72km (ideal conditions)

## **AKO S1000 Solar Electric Fence Energiser - 1.0Joule output - Services 2.5 - 4.0 Hectares**

Price: **815.00**

The AKO S1000 Solar Electric Fence Energiser is a powerful, German-engineered solution designed for portable and remote electric fencing needs. Perfect for rotational grazing, remote paddocks, or temporary fencing, the unit runs entirely on solar power—making it ideal for off-grid use.

With the ability to power up to 35km of fencing in perfect conditions, and around 10km in areas with minimal vegetation, the S1000 offers high performance in a compact, transportable format.

It can be placed directly on the ground or mounted on a Y-post for flexibility in setup.

The unit comes supplied with an earthing stake for easy installation and is backed by a 4-year warranty on the energiser and a 5-year warranty on the solar panel, ensuring reliable performance and peace of mind.

### Key Features:

- Powers electric fencing up to 35km (ideal) or 10km (light vegetation)
- Integrated solar panel – no external power source needed
- Fully portable – place on ground or mount on a Y-post
- Includes one earthing stake

## **Styx Electric Fence Offset Outrigger - 175mm, Black UV-Stabilised Plastic**

Price: **4.75**

The **175mm Electric Fence Offset / Outrigger** is a simple and durable solution for extending electric wire away from posts or rails. Whether you're retrofitting an existing fence or building new, this outrigger offers flexibility, strength, and easy installation.

### **Key Features:**

- 175mm long offset – ideal for standard electric fencing clearance
- Attaches directly to Styx Battens without staples or tools
- Can be fixed to wooden or plastic posts using nails, screws, or staples
- UV-stabilised and built for New Zealand conditions
- Made in New Zealand
- 5-year warranty against breakage
- Also available in 300mm and 400mm lengths

### **Ideal for Horse Fencing**

Electric outriggers are particularly effective for horse fencing, helping to keep horses safely away from boundary fences and reducing the risk of injury or damage. By spacing the hot wire 175mm from the main fence line, these offsets discourage horses from leaning, rubbing, or

## Styx Electric Fence Offset Outrigger - 300mm, Black UV-Stabilised Plastic

Price: **5.00**

The **300mm Electric Fence Offset / Outrigger** is a strong, UV-stabilised solution designed to keep electric fence wires spaced safely from your main fence line. Ideal for extending hot wires for increased animal safety or fence protection.

Designed by Styx and manufactured in New Zealand!

### Key Features:

- 300mm long offset – ideal for wider electric fencing clearance
- Attaches directly to Styx Battens without staples or tools
- Can be fixed to wooden or plastic posts using nails, screws, or staples
- UV-stabilised and built for New Zealand conditions
- Made in New Zealand
- 5-year warranty against breakage
- Also available in 175mm and 400mm lengths
- Extremely safe for equine use, and designed to present 40mm tape with spiraling
- Proven safe and effective for horses, bulls, cows, deer, and more

**Ideal for Horse Fencing**

## **Styx Electric Fence Offset Outrigger - 400mm, Black UV-Stabilised Plastic**

Price: **5.60**

**The 400mm Electric Fence Offset / Outrigger** provides maximum wire clearance for demanding fencing applications. Designed for strength and durability, this extra-long outrigger is perfect for protecting boundary fences, managing high-pressure stock areas, or electrifying existing fences where additional spacing is essential.

Engineered by Styx and proudly made in New Zealand, it combines flexibility, strength, and quick installation — ideal for both new fencing and retrofit projects.

### **Key Features:**

- 400mm long offset – ideal for extended clearance from fence lines
- Attaches directly to Styx Battens without staples or tools
- Can be fixed to wooden or plastic posts using nails, screws, or staples
- UV-stabilised and built for New Zealand conditions
- Made in New Zealand
- 5-year warranty against breakage
- Also available in 175mm and 300mm lengths

**Ideal for Horse Fencing**
